

thank  
YOU!

# Hi Terry,

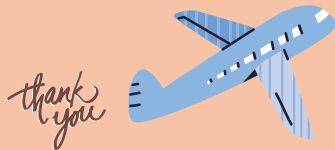

Thank you for being an incredible mentor over the year of my placement. It was amazing working with you and learning from your wisdom.

The opportunities you got me involved opened my eyes to a new world of possibilities which shaped my aspirations even till today. I still remember our first meeting with Rachel when you discussed the future of FinTech - like many conversations we had it left a great impact on my social awareness. Working on the anti-human trafficking platform made me feel empowered to drive real and positive changes for the first time. The growth I achieved would not be possible without your trust and support.

Looking back the start of lockdown was quite a scary time to live in, but I never like felt so because I was always well looked after. Thank you for checking in everyday on how I was doing and cheering me up. As much as you joked tech team are a cynical bunch, it was the most supportive and nurturing place to be 😊 I do miss our morning coffees, hope to catch up soon!

All the best,  
Lily

P.S. Having fun piloting above the landscape of England!
